SUMMARY

Skilled Software Quality Engineer with 8 years of experience in manual and automation testing. Committed to delivering high-quality software solutions and driving continuous improvement.

EXPERIENCE - 8 YEARS

Lead SQA & Automation Engineer

Code District

Feb 2022 - Present

- Leading QA initiatives across a variety of web and mobile applications, ensuring high-quality software releases through structured manual and automation testing.
- Developed and maintained scalable automation frameworks using Playwright (JavaScript) and Selenium (Java) for efficient regression and functional testing.
- Conducted in-depth API testing and automation using Postman and Rest Assured, validating request/response flows, status codes, and data integrity across multiple services.
- Regularly delivered training sessions and technical workshops for QA team members on manual testing practices, automation frameworks, and API testing.

Lead SQA & Automation Engineer

Cartlow

May 2021 - Feb 2022

- Led QA efforts for a large-scale recommerce platform operating across the UAE, KSA, and Kuwait.
- Performed comprehensive testing on multiple web platforms (e.g., Cartlow, IMS, B2B portals) and native iOS & Android mobile apps.
- Designed and executed test plans for functional, regression, smoke, and exploratory testing across web and mobile channels.
- Built and maintained automated test suites using Selenium for web, and Appium for Android/iOS applications.
- Trained and mentored new QA team members in both manual and automation testing methodologies.

Sr.SQA & Automation Engineer

ASA Ventures

Mar 2019- May 2021

- Worked on multiple web and mobile applications across domains such as eCommerce, healthtech, call centers, and employee management systems.
- Wrote comprehensive test cases from business requirements and performed functional, regression, and usability testing.
- Designed and implemented automation frameworks using Selenium and Appium, increasing test coverage and reducing release cycles.
- Performed API testing using Postman and validated integrations between systems.
- Collaborated with cross-functional teams in Agile setups to ensure quality deliverables in each sprint.
- Actively tested multi-role based applications with complex permission modules and dynamic workflows.

PROJECTS

Barrett Values Centre (Code District)

A vast project for taking assessments and generating reports from a single person to national level.

<https://www.valuescentre.com/>

VALIS BioScience (Code District)

Contains several smaller projects related to medical science. Mostly focuses on creating and sending assessments and surveys to the users for their checkups or for collecting data. Completely tested all the projects and handed them over to the customer.

<https://www.valisbioscience.com/>

Cartlow Web/Mobile (Cartlow)

E and Re-commerce website. Also, have options to sell your items. Currently serving as a leading business of e and re-commerce in Dubai/KSA/Kuwait. Completely tested and automated it.

<https://www.cartlow.com/>

SQA Engineer

IOSYNCH Tech

Mar 2018- Mar 2019

- Participated in requirement analysis and identified test scenarios based on user stories and business needs.
- Designed and executed manual test cases for mobile and web platforms (Android, iOS, and browser-based apps).
- Logged bugs in project management tools and followed the complete defect life cycle from reporting to closure.
- Collaborated closely with developers, designers, and the product team to ensure alignment on acceptance criteria.
- Developed basic automation scripts using Selenium and Appium for mobile and web platforms. validation, and functional workflows..

PROJECTS

Callix (ASA Ventures)

A complete call center solution. Its a new idea of creating your own call center in 5 minutes.

<https://beta.callix.us/customer/login>

Retainoo (IOSYNCH)

It is a complete retention project about salon systems. It has 4 app views each have different roles. It also has a web portal for super admin. I have done all its automation through selenium and appium.
